

SECTION IV: OPERATIONS

J. MULTI-LANE ROADWAYS

Multi-lane roadways are streets or highways with two lanes of traffic in both directions such as North or South Morrison Blvd. in Hammond, University Ave. in Hammond, or sections of Hwy 16 in Amite. Every effort should be made to avoid loading or unloading students at a bus stop that would require them to cross a multi-lane roadway. School bus routes should be designed so as to provide right side pick-up and drop-off for students residing on such multi-lane roadways. If a driver experiences such a situation, he/she should contact their Field Coordinator for assistance in resolving this situation.
